ABSNet Scheduled Export

Broader Access to Data that Drives Your Mission Critical Applications

Lewtan Technologies has successfully provided the most comprehensive database of ABS/MBS deal performance data through its ABSNet™ portal. ABSNet is the structured finance industry's leading source for asset-backed securities surveillance and intelligence. Combining detailed performance data, powerful analytics, and a wealth of related information on asset-backed securities, ABSNet provides valuable research, analysis and decision-support tools for issuers, investors and other market participants.

Given the current status of the markets, timely access to critical information that impacts credit sensitive investments is more important than ever. In addition, increased regulatory scrutiny requires the ability to demonstrate better risk management controls and reduce operational risk associated with structured finance investment activities in your firm.

Time consuming, labor intensive data collection activities can now be streamlined and monthly performance data can be efficiently integrated into your organization's databases and systems via Lewtan's Scheduled Export feed

ABSNet Scheduled Export at a Glance

With ABSNet Scheduled Export, you receive a daily file which includes:

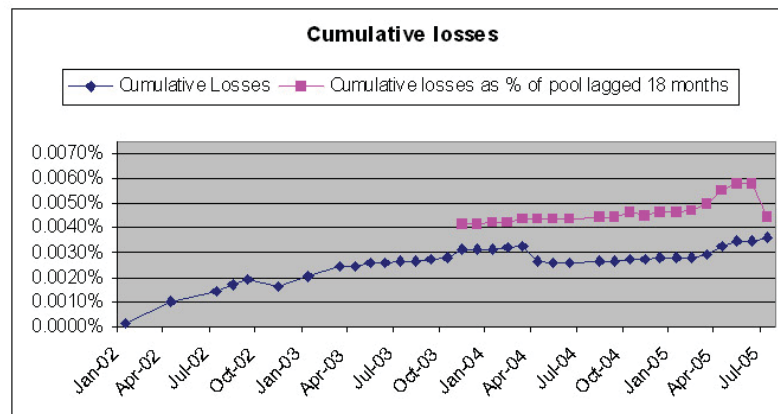

- Collateral and bond performance information.
- Original terms and conditions.
- Credit support information.

Features include:

- Deal updates within 48 hours of remittance report availability.
- XML data structure.
- Full historical performance data available.
- Complete documentation.
- Customized portfolio files available.

Customized Output:

ABSNet Scheduled Export data can be used by your organization to create myriad analyses.

Assist Clients in Meeting Industry Best Practices for:

- Improved Risk Management
- Credit Surveillance
- Operational Efficiency
- Regulatory Compliance

Additional Features

- Independent source of credit performance data necessary to monitor your credit risk on thinly traded cash and synthetic structured instruments.
- Dedicated product support specialists—on hand to offer you support and expertise in the integration of new data into your organization's database environment.
- Access to trained credit surveillance staff to offer you timely responses to on-going inquiries
- Demonstrated QA process to ensure your risk management systems use valid input data.
- A source of independent data to reduce your risk of fraudulent behavior.

Benefits

- Mitigate risk of damage to your organization's reputation through investment in risk management data and systems.
- Reduce your risk associated with errors resulting from manual data collection processing.
- Elimination of operational re-work.
- Reduction of data redundancy (data stored in multiple storage facilities manufactured using inconsistent/disparate sources).
- Reduce staffing required to manage your business operations in all market environments.

About Lewtan Technologies

Through offices in North America and Europe, Lewtan Technologies, Inc., offers a wide range of content- and technology-based solutions to members of the global asset-securitization industry, including issuers, investors, underwriters, servicers, credit enhancers, and rating agencies representing more than 400 institutions worldwide. The company has twice been named Global Technology Provider of the Year by International Securitisation Report. In 2007 the company received the Innovation Award and commendations for client service and best-in-class surveillance tool in Money Market's Securitisation Review & Survey Technology Awards. In addition, the company received Credit Magazine's Technology Innovation Award. More information is available at www.lewtan.com.
